SUMMARY

Analytical professional with technical knowledge and critical thinking skills to thrive in data-driven environments. Tackles challenges with positivity and drive to overcome. Works great alone or with others and consistently exceeds expectations.

SKILLS

Technical: Node.js development, Machine Learning, Python, C, Java, SQL, CSS, Data Analysis, Adobe Photoshop & Premiere Pro
Hobbies: Event Coordination, Video editing, Graphic design, Tennis, Basketball
Language: English, French, Tamil

EXPERIENCE

Summer Intern, CubeAI Solutions <i>Coimbatore, India</i>	<i>May 2026 – June 2026</i>
- Implemented intelligent workflows for ticket classification, prioritization, routing, and lifecycle management to streamline service processes. - Developing autonomous AI agents using Agentic AI frameworks for enterprise service ticket automation. - Building backend integrations with APIs and databases to support scalable AI-driven automation. - Improved AI system performance through continuous monitoring and optimization of accuracy and response quality, enhancing overall system reliability. - Contributed to real-world applications of autonomous AI systems and modern agentic architectures, advancing practical AI deployment.	
Project Intern, TechMango <i>Madurai, India</i>	<i>January 2026 – May 2026</i>
- Implemented automated checks for ad policy violations using computer vision and rule-based validation to ensure compliance accuracy. - Developed prototype for video advertisement compliance verification module on Aptimeta platform to enhance ad regulatory adherence. - Built backend APIs for video ingestion, processing, and compliance reporting to streamline data management.	
Lead Math and Reading Tutor, Kumon Math and Reading of North America <i>Mooresville, United States of America</i>	<i>April 2021 – May 2023</i>
- Led small-group instructional sessions, strengthening students' problem-solving, analytical reasoning, and reading comprehension abilities. - Led small-group sessions, enhancing students' problem-solving, analytical reasoning, and reading comprehension skills. - Monitored student progress and identified learning gaps to collaborate with instructors on personalized learning plans.	

EDUCATION AND TRAINING

Bachelor of Engineering – Computer Science and Engineering (AI & ML) <i>PSG College of Technology, Coimbatore, India</i>	<i>Expected May 2027</i>
- Events Head of the PSG Tech Finverse Club. - Co-Founder of the REVLIN Hybrid Training Community. - Continuing Education: Operating Systems, Database Management, Big Data, Machine Learning, Artificial Intelligence, Design and Analysis of Algorithms, Data Structures. - Participated in the 2024 Smart India Hackathon, Guidewire Hackathon, Infosys Global Hackathon, Samsung Prism Hackathon.	
High School Diploma <i>Lake Norman Charter High School, Huntersville, United States of America</i>	<i>May 2023</i>
Ranked in Top 10% of class.	

- Member of the National Honors Society.
- State Board of North Carolina High School Diploma.
- 3.6 GPA.

High School Diploma

August 2021

South Iredell High School, Statesville, United States of America

- Completed the International Baccalaureate MYP Diploma.
- Member of the Varsity Men's Tennis Team.
- 3.47 GPA.

PROJECTS

Sri Naga Sai ERP | AI-Powered ERP & Document Management System | github.com/aakashs23/snserp

- Developed an AI-powered Enterprise Resource Planning (ERP) and document management system to digitize and automate business operations for a solar energy company, replacing manual spreadsheet-based workflows with a centralized platform.
- Built a full-stack web application using Next.js, React, TypeScript, FastAPI, PostgreSQL, and Supabase, implementing secure authentication, role-based access control (RBAC), document storage, invoice management, and business analytics dashboards.
- Integrated local AI-powered document intelligence using Ollama, Qwen, PaddleOCR, ChromaDB, and LangChain to enable OCR, document classification, metadata extraction, semantic search, Retrieval-Augmented Generation (RAG), AI-assisted document summarization, and natural language querying.

Tech Stack: Next.js, React, TypeScript, FastAPI, PostgreSQL, Supabase, Tailwind CSS, Ollama, Qwen, PaddleOCR, ChromaDB, LangChain, PyMuPDF

AI Wallet | AI-Powered Personal Finance Platform | github.com/aakashs23/aiwallet

- Developed an AI-powered personal finance platform that automates transaction tracking, budget management, subscription detection, and personalized financial insights to improve financial decision-making.
- Built a full-stack web application using React.js, Node.js, Express.js, PostgreSQL, and Python, integrating OCR, computer vision, and natural language processing (NLP) for receipt scanning, expense extraction, and intelligent financial analysis.
- Implemented PaddleOCR and OpenCV to automate receipt data extraction and developed AI-driven features for expense categorization, anomaly detection, and financial insight generation.

Tech Stack: React.js, Node.js, Express.js, PostgreSQL, Python, Tailwind CSS, PaddleOCR, OpenCV

Alumni Connect | Full-Stack Investment Platform | github.com/aakashs23/AlumniConnect

- Developed a full-stack investment platform enabling students to raise funding for innovative projects while allowing alumni investors to discover, evaluate, invest in, and manage project portfolios through role-based dashboards.
- Designed and implemented secure authentication, role-based access control (RBAC), RESTful APIs, and investment tracking workflows, supporting project approvals, funding progress monitoring, and investor portfolio management.
- Built a responsive and scalable web application using React.js, Node.js, Express.js, MongoDB, and Tailwind CSS, following modern full-stack development best practices.

Tech Stack: React.js, Node.js, Express.js, MongoDB, REST APIs, Tailwind CSS

CareerNav | AI-Powered Career Planning Platform | github.com/aakashs23/CareerNav

- Developed an AI-powered career planning platform that generates personalized career roadmaps, learning paths, and job recommendations based on user goals and skill progression.
- Integrated AI-driven recommendation modules and timeline generation features to deliver customized career guidance and learning recommendations.
- Designed and developed a responsive full-stack web application using React.js, TypeScript, Express.js, MongoDB, Python, and Tailwind CSS, ensuring scalability and an intuitive user experience.

Tech Stack: React.js, TypeScript, Express.js, MongoDB, Python, Tailwind CSS
